Hej Jan

Jeg går ud fra I har vurderet det nødvendigt med en advarsel pop-up. Ingen alarm herfra, kør bare med det!

Bh'er

Jens

**Subject:** Multi-specimen and multi-container warning for Digi App

Dear Christian,

For the Digitization App, we are working on adding a warning in the context of users processing a multi-specimen/object.
The warning will be a sign embedded in the app user interface and will be similar to what you see below.

Do you think this solution is acceptable?

Kind regards,

Jan K. Legind
